

## SKIDDING AND JACKING SYSTEMS

Design and fabrication of complete rig skidding systems and substructures, as well as jacking systems for tubing and casing. Lean and cost-effective solutions.

Simple systems, comprising:

- Skidbeams
- Gripperjacks
- Substructure
- Tubing jack
- Access stairs
- Hydraulic power units

Skidbeams with substructure for support of ie. coiled tubing mast. Load capacity is 100 T on 16 m rig skidbeams span.

Adjustable gripperjacks for skidding system.

Complete conductor jacking systems comprising heavy duty jack with 450 T capacity and 4.2 m stroke, including control cabin and supporting skidbeams with gripper jacks.
