

UMBILICAL WINCHES

Design and fabrication of high capacity, large bending radius, hydraulic driven umbilical winches, with flexible wire-guiding systems, and with remote control and constant tension control. Novel, side-supported drum, heavy duty design.

Winch features:

- Customised drum capacity
- Customised speed/pull
- Plain or grooved drum
- Oil supply from built in hydraulic power unit, or from 210 bar ring-line system
- Adjustable wireguiding mechanism

Built on zone 2 rated hydraulic power unit.

Customised design, with integral control unit
